DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 4/14/06 have been fully considered but they are not persuasive. Applicant argues absorbency can not necessarily be linked to size and Ronn does not provide products with the same size and absorbency characteristics. However, the examiner has relied on Ronn for a teaching of two or more size designations as the claim requires. The examiner notes that Ronn does not specifically provide absorbency designations. However, the examiner disagrees that one can not correlate size and product designations and absorbency. In the case of Ronn, the display designates different stages of toilet training. In the later stages of toilet training, the toddler is generally provided with a more lightweight, pantlike garment with decreased absorbency to aid in toilet training. In this instance one having ordinary skill in the art would be motivated to provide information regarding the absorbency of the product.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1, 2, 5, 6, 8-16, 18-22, 25, 27-31, 34, 35, and 37-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ronn et al. USPN 6648864.

Regarding claims 1, 2, 5, 22, 25, 29-31, 34, and 39-45 discloses a visual identification device for absorbent articles comprising: two or more size designations and two or more product designations (Figure 4a). Ronn does not specifically disclose two or more absorbency designations. However, because the display designates different sizes and different stages of development, it would have been obvious to one of ordinary skill in the art at the time the invention was made to inform the consumer about different absorbencies, since the general concept is to provide a fit appropriate for the child's state of development and it is considered obvious that different sizes and particularly different stages of development, such as a training pant, has different levels

of absorbency. For example, Glaug USPN 5649914 teaches a toilet training aid with a low absorbent capacity.

As to claims 6 and 35, see Figures 4a-5a.

As to claims 8, 9, 27, 28, 37, and 38, see Figure 4a where the products have graphical codes denoted by indicia as broadly as claimed.

As to claims 10 –16 and 18-21, see col. 2, lines 15-46.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
